

javascript光标:javascript在一段文字中的光标处插入其他文字

疯狂代码 <http://www.crazycoder.cn/> j:<http://www.crazycoder.cn/Javascript/Article45774.html>

例如:个文本框里有段文字我要通过点击鼠标并且在相应地方插入文本
我是这样做:先获得文本框值TextArea.Value然后.TextArea.Value + 其他文本

```
<script type="text/javascript">
function Caret(textObj){
  (textObj.createTextRange){
    textObj.caretPos=document.selection.createRange.duplicate;
  }
}
function insertAtCaret(textObj,textFeildValue){
  (document.all){
    (textObj.createTextRange&&textObj.caretPos){
      var caretPos=textObj.caretPos;
      caretPos.text=caretPos.text.charAt(caretPos.text.length-1)?textFeildValue+":textFeildValue;
    }{
      textObj.value=textFeildValue;
    }
  }{
    (textObj.SelectionRange){
      var rangeStart=textObj.selectionStart;
      var rangeEnd=textObj.selectionEnd;
      var tempStr1=textObj.value.sub(0,rangeStart);
      var tempStr2=textObj.value.sub(rangeEnd);
      textObj.value=tempStr1+textFeildValue+tempStr2;
    }{
      alert("This version of Mozilla based browser does not support SelectionRange");
    }
  }
}
</script>
<form id="form1" action=""
_disibledevent="insertAtCaret(this.form.tarea,this.form.textfield.value);"/>
</p>
```

</form> 2008-12-27 15:21:24
